### Asia Pacific Adaptation Network (APAN)

The Asia Pacific Adaptation Network (APAN) was established in October 2009 as part of the Global Climate Adaptation Network (GAN). It aims at building the climate resilience of vulnerable human system, ecosystem, and economies through the mobilizations of knowledge and technologies to support adaptation capacity building, policy-setting, planning and practices. APAN is the first network under the GAN supported by the UNEP, IGES, AIT-UNEP RRCAP, ADB, SIDA, and APN.
