

Green Economy and Domestic Carbon Governance in Asia

アジアにおけるグリーン経済と国内における カーボン・ガバナンスについて

ISAP White Paper IV “Greening Governance in Asia-Pacific” July 25, 2012

Kazuhisa KOAKUTSU

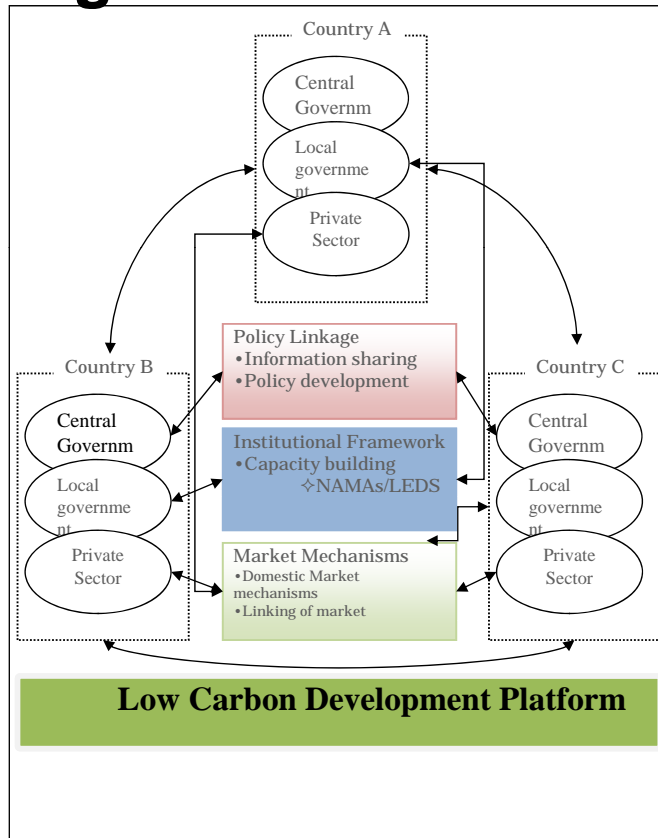

Deputy Director, Market Mechanism Group
Institute for Global Environmental Strategies

5 Key Messages on Climate Policy

1. Climate policy has been shifting to the realization of **low carbon development** and **green economy**.
2. Many Asian countries have embarked on the development of policy in this direction.
3. We learn many things from **institutionalization** of the CDM (clean development mechanism) towards SD and expanding domestic carbon market.
4. **Regional platform** needs to be established to compliment the international (UNFCCC) and national efforts to address climate change
5. It will support 1) **policy analysis**, 2) **capacity building**, and 3) **market mechanisms**

We need Regional Platform for LCD

- (1) **Policy coherence** (SD, Low Carbon Development, Green Economy)
- (2) **Support of national policy making** (NAMA, National Climate Policy, Energy Policy)
- (3) **Financial mechanisms** (Promotion of domestic carbon market, Regional linking of domestic carbon market)

- 1. Information sharing
- 2. Capacity building
- 3. Facilitation of financial mechanism
