

Development of Smart Communities in Asian Cities

ISAP 2012, 25 July 2012, Pacifico Yokohama

Outline

- This session introduces **a smart community** being developed in Higashida Area in **Kitakyushu City**, Japan and the city's efforts in extending support to develop similar models in **Surabaya, Indonesia** and **Putrajaya, Malaysia** in cooperation with other partners in Japan. This session discusses the constraints and challenges to disseminate similar approaches in terms of legal, institutional and technical aspects with focuses on connection to the national grid and the potential of a city-to-city cooperation modality to promote that.
