# Linking efforts on Urban resilience in the region

1. APAN has extensive experience on different issues related to DRR and CCA including urban resilience. The key lies in learning and sharing experiences with other organizations projects in the region on the various issues, priorities and topics in the region.
2. Through:
  - Knowledge management- uploading relevant information and publications on the APAN website
  - APAN Forum
  - Joint research

Mobilising Knowledge and Building Capacities for Climate Resilience [www.asiapacificadapt.net](http://www.asiapacificadapt.net)

## Linking efforts on Urban resilience in the region

- Joint proposal/ joint implementation
- Joint activities including workshops/ conferences to disseminate the outputs of work, learn about new and emerging issues and priorities on the topic, identify needs and gaps for further research and capacity building of relevant stakeholders, encourage peer to peer learning.
