

Global Warming is real!

GWG emission should be managed!

Budget for the 2° C target: 790 GtC :CO₂ emitted until 2011: 515 GtC

Remaining Emissions: **275GtC**

Global Carbon Management System is essential!

In order to establish Global Carbon Management System

- International agreement is critical.
- Reliability and effectiveness
- Establishment of **MRV** system.
- Integration between other targets such as **poverty** issues and **development** issues.
- Success story is critical!

NIES Research Targets

- Carbon Cycle+Framework of International Collaboration
- Mitigation scenario study by AIM
- Action-related Research(Adaptation and mitigation)
