Research Topics (1)

- International regime on climate change, including the Paris Agreement
 - How to design the regime (including “the Paris Rulebook”) to enhance its effectiveness?
- Project on Climate change mitigation Policy Progression Indicator (C-PPI)
 - <http://www-iam.nies.go.jp/climatepolicy/cppi/index.html>

Research Topics (2)

- How to enhance climate actions by non state actors in the globalized economy.
 - How to manage/reduce emissions from globalized supply chain?
 - Role and function of *de facto* business standards (no legally binding agreement).
 - Ex. TCFD recommendations
- Securitization of climate change issue
 - How the international climate regime addresses such securitized issues?
 - Migration
 - Legal issues relating to loss/reduction of territory due to sea level rise
 - Responses by financial sector for climate related risks
