

ISAP2018
Invitation to Talanoa Dialogue

18 July 2018

Michihiro Oi
Ministry of the Environment Japan

Talanoa Dialogue and Paris Agreement

Key feature of the Paris Agreement

- Long term goals: 2 degree goal, balance of anthropogenic emission and removal in the second half of 21st century etc.
- Each country sets its target (NDC) and updates it every 5 years
- Global Stocktake for the long term goal every 5 year (from 2023)
- The outcome of GS informs to each party's update of target.

Decision 1/COP21 paragraph 20

Decide to hold a “facilitative dialogue” in 2018, aiming to:

- take stock of progress toward the long term goals of the Paris Agreement Article 4
- share information on the status of preparation of each party's NDC.

- 
- ❑ At COP21, PA was thought of as the post-2020 regime. Talanoa Dialogue was established as a preparatory work until the PA becomes effective.
 - ❑ PA came into force in 2016 earlier than expected.
 - ❑ TD(2018) as a Test of the Global Stocktake(2023,2028 · ·) or the 1st GS virtually.

Talanoa Dialogue: Way forward

- Input from all parties and non-state actors (until 29 Oct. 2018)

Anybody can submit input at <https://talanoadialogue.com/>

- IPCC Special Report on 1.5°C target. (Oct. 2018)

COP24 Political Phase (Dec 2018)

Ministerial Roundtable etc.

Talanoa Dialogue Platform - Japan

Talanoa ● JAPAN

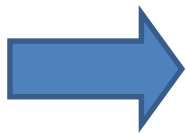

A portal of best practices to shape the future on climate change

A portal to share climate actions by non-state actors in Japan, including business, local governments, NGOs and all other stakeholders.

<http://copjapan.env.go.jp/talanoa/>

<https://www.facebook.com/talanoajapan/>

- ① Call for best practices relevant to 3 key questions of Talanoa Dialogue (Current actions, goals, and approaches. A reporting template is available)
- ② The best practices will be collated and made available on the portal site.
- ③ Part of the best practices will be featured through the official Talanoa inputs by the Government of Japan to UNFCCC

Further promotion of climate actions by all stakeholders
