

North-East Asia Low Carbon City Platform (NEA-LCCP)

Sangmin Nam, PhD
Deputy Head, ESCAP-ENEA

Economic and Social Commission for Asia and the Pacific (ESCAP)

((53 member states, 9 Associate members))

ESCAP HQ
Bangkok, Thailand

East and North-East Asia Office
Incheon, Republic of Korea

North and Central Asia Office
Almaty, Kazakhstan

South and South-West Asia Office
New Delhi, India

Pacific Office
Suva, Fiji

- China
- Dem. Rep. of Korea
- Japan
- Mongolia
- Rep. of Korea
- Russia

- HK, China
- Macao, China

Air Pollution

- **Launched in 1993 by six North-East Asian countries**, i.e. China, DPR Korea, Japan, Mongolia, RO Korea and Russia

Biodiversity

- Supported by ESCAP (Secretariat)

Climate Change

Low Carbon cities

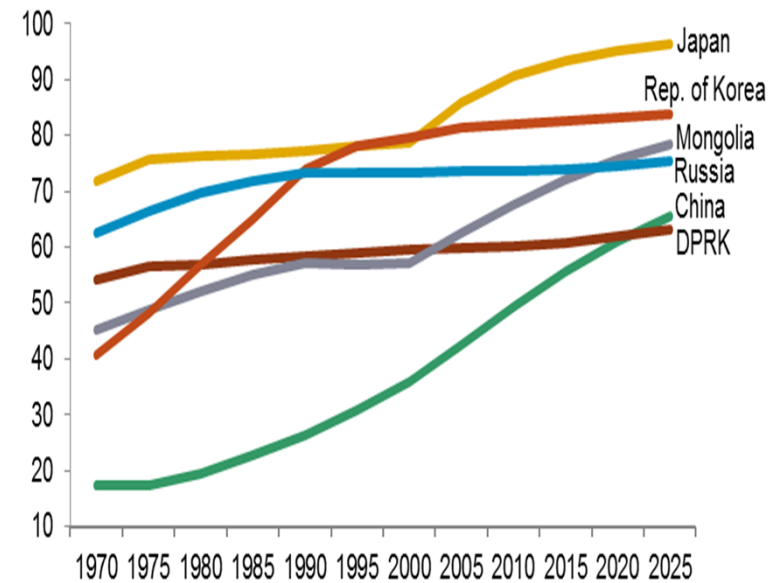

Desertification and Land Degradation

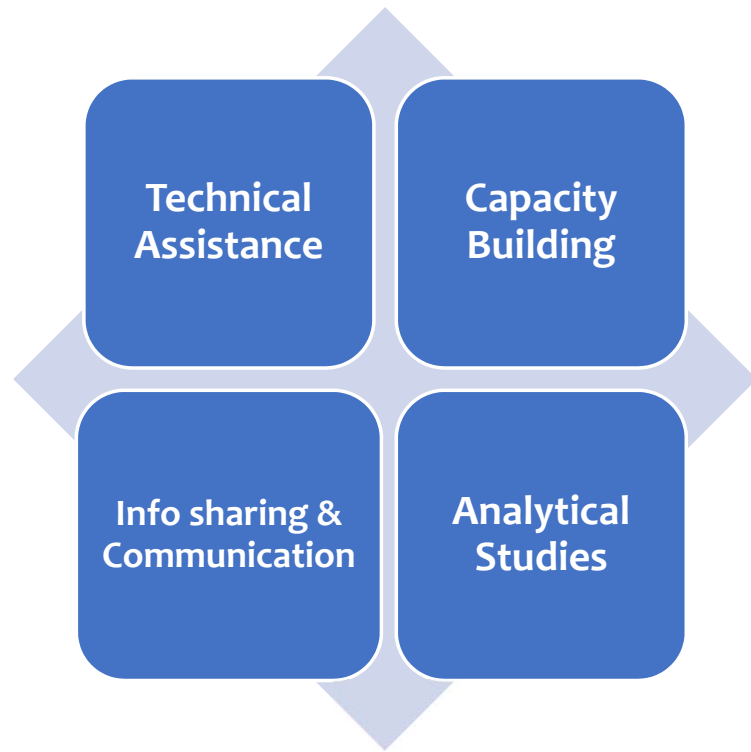

Why low carbon cities?

- Cities - **70%** of global GHG emissions
- North-East Asian countries - **37 %** of global GHG emissions (2017)
- Continuing urbanization and per capita consumption
- Cities - **'policy labs'**
- **Low carbon cities** as a key element of the Low greenhouse gas emission development strategies under the Paris Agreement

Share of urban population in North-East Asia, 1970-2025

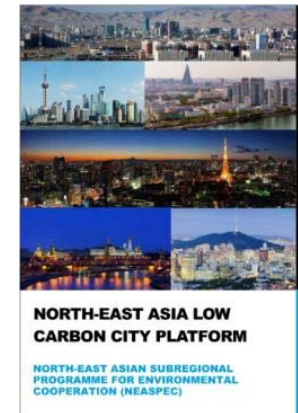

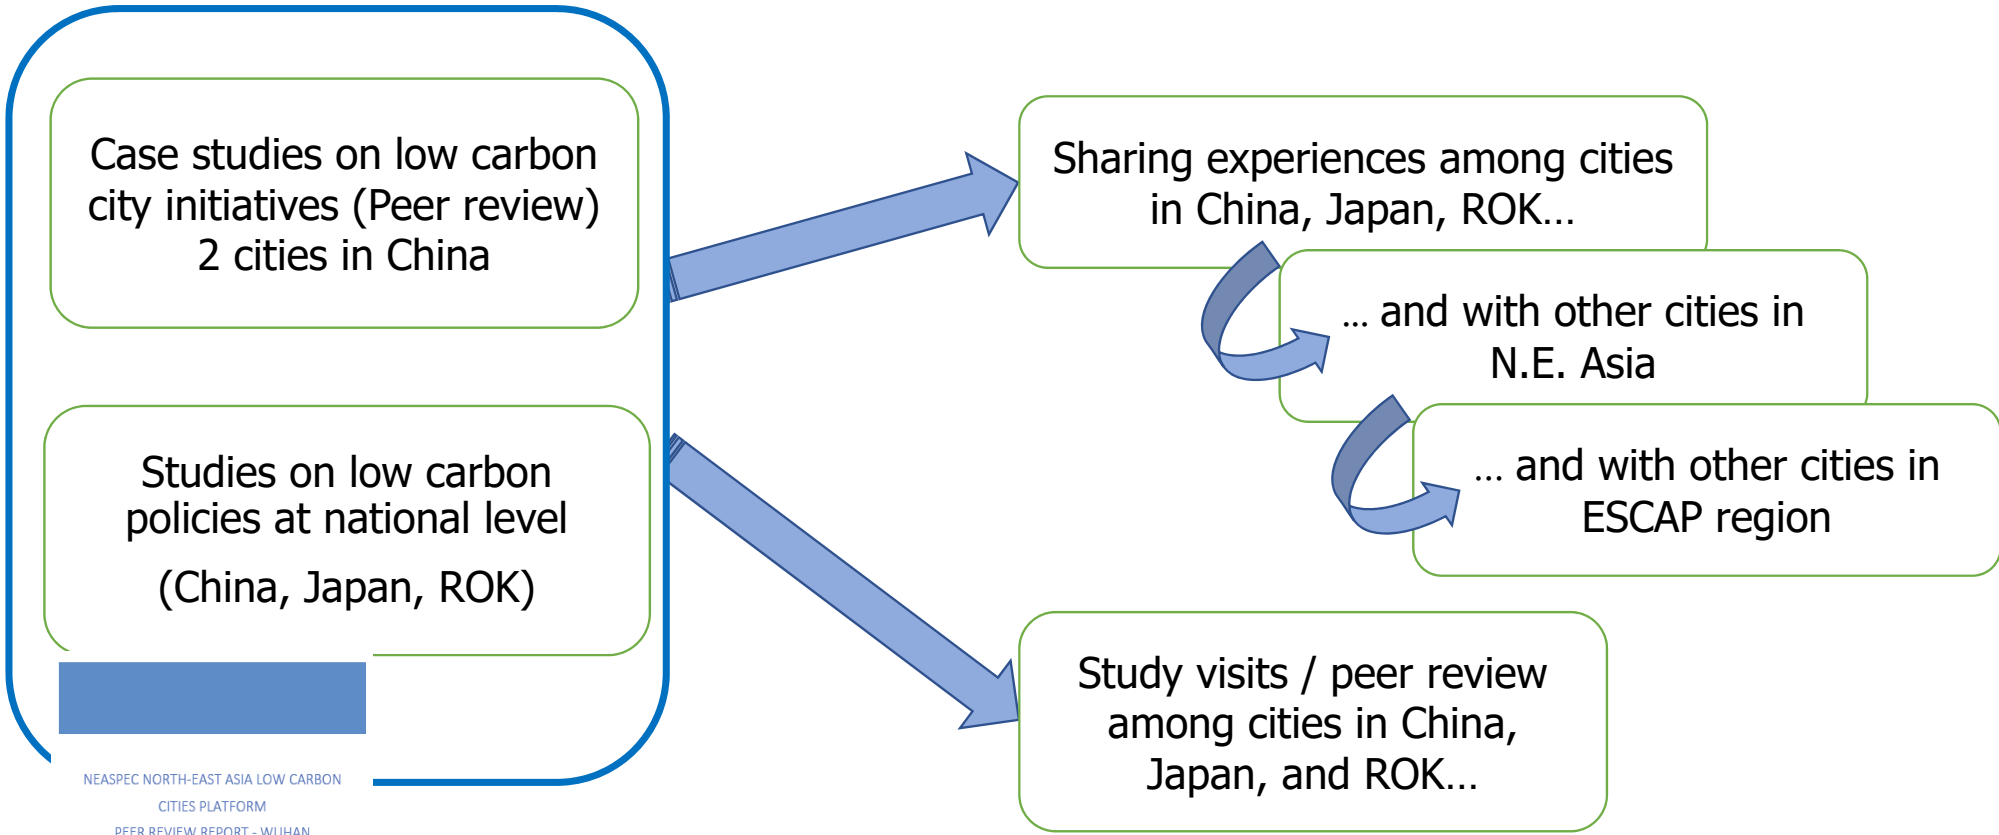

NEASPEC / NORTH-EAST ASIA LOW CARBON CITY PLATFORM (NEA-LCCP)

OBJECTIVES

1. Bring together **existing and new information and knowledge** on LCC
2. **Synergize the works** of specialized organizations; and
3. **Collectively support municipal authorities**

Significant potential for synergy / collaboration with
CJK research

Innovative Green Development Program
7-5-SL JIANGSU/BEIJING DIPLOMATIC RESIDENCE COMPOUND, NO. 1, FUDISHI
STREET, CHAOTIANG DISTRICT, BEIJING, 10069 P.R. CHINA

Peer Review

China: 87 low-carbon pilots through three batches, including 6 provinces, 79 cities and 2 counties.

Preparation

- Analysis of primary and secondary sources
- Preparation of **the background report** on the city's low carbon development

Consultation

- A **Peer Review Workshop** in the City, focusing on (1) City's low carbon management system and (2) Sectoral Approach for low carbon pathways

Assessment

- **Review of the inputs** from the Workshop: Low carbon governance and sector-specific strategies
- **Production of the peer review report** with analyses and policy recommendations for the City

COMPARATIVE STUDY

Generate knowledge and overview

Comprehensive and systematic overview of Northeast Asian countries' approaches and current status

Identify best practices and recommendations

Best practices from city case studies on specific sectors/ issues, and provide recommendations

Share information and promote cooperation

information sharing and cooperation
dissemination of the study outputs

In collaboration with

绿色创新发展中心
Innovative Green Development Program

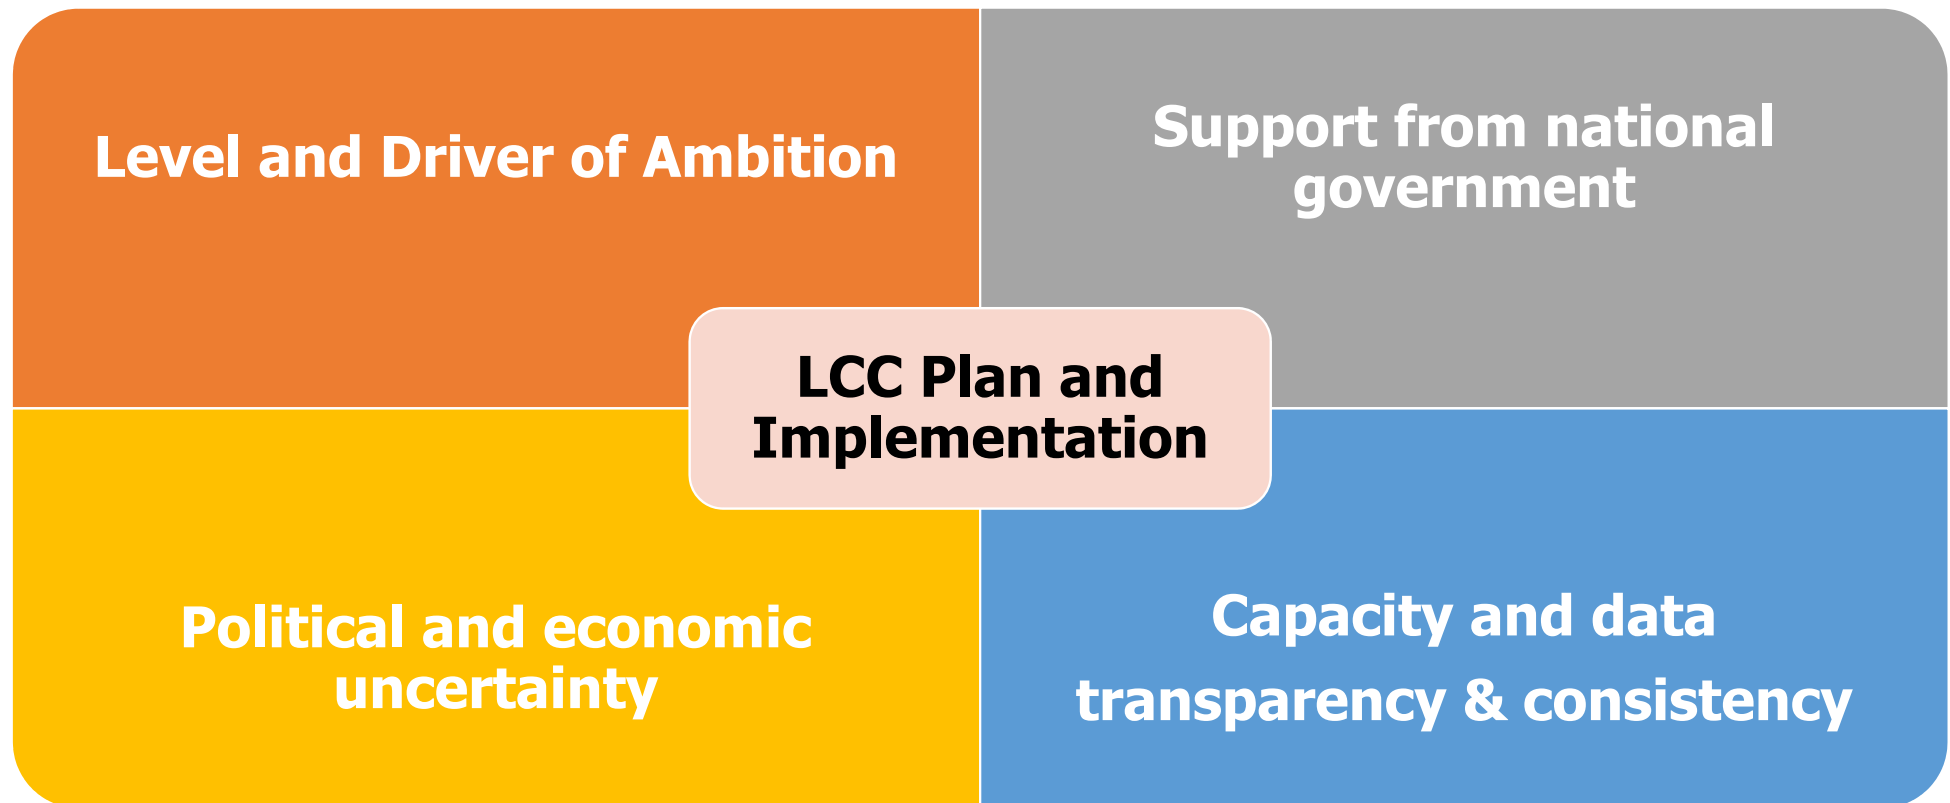

Institute for Global Environmental Strategies

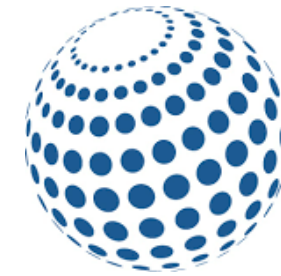

Korea Environment Institute

Identified Common Challenges in Low Carbon City Development

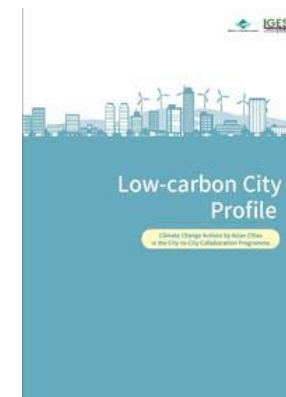

Benefits and approaches of Cooperation for Low Carbon Cities

1. Facilitating knowledge-sharing
2. Providing common platforms
3. Building human and policy capacity
4. Financing low-carbon urban infrastructure
5. Empowering cities in national action
