Launching Ceremony in Karuizawa, Nagano, Japan

● AP-PLAT was established on 16th June, 2019 during G20 Ministerial Meeting to share climate risk and adaptation information via online with the stakeholders.

AP-PLAT

Asia-Pacific Climate Change Adaptation Information Platform

Mission

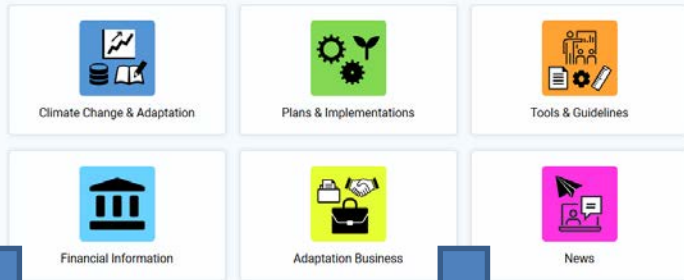

Enabling environment for climate-risk informed decision making and practical adaptation action through synchronizing and harnessing best available efforts among partner countries and organizations

Useful practices / tools from partners

e.g. ADB RCC.AP

Core Pillars of Activities with Partners

Scientific Information/ Knowledge

- Development of scientific climate-related risk data & information
- Generation of tailor-made climate-related risk information through integration of existing data, information and knowledge

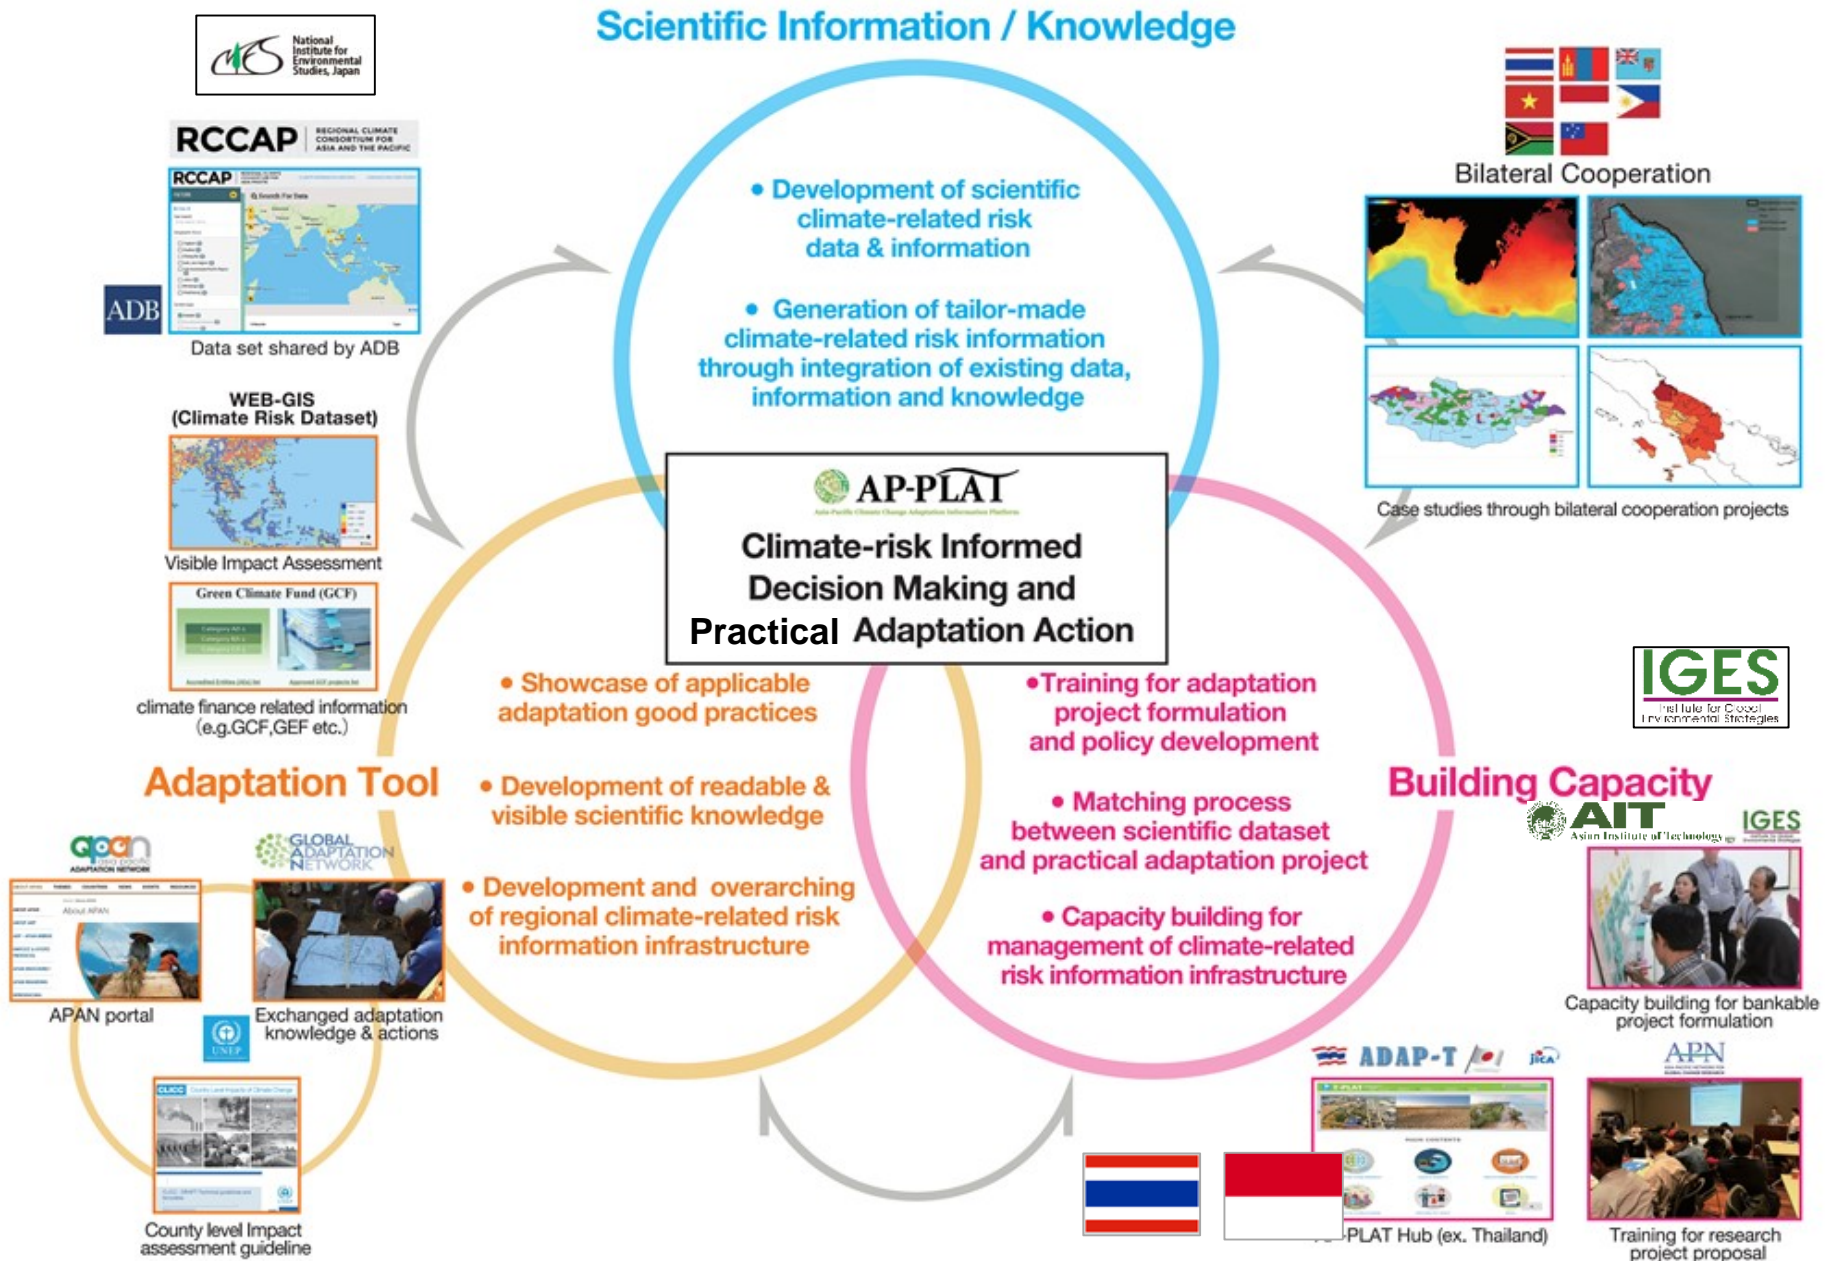

Adaptation tool

- Showcase of applicable adaptation good practice
- Development of visible scientific knowledge
- Set up and overarching regional climate-related risk information infrastructure

Building capacity

- Training for policy development by mainstreaming climate risk information
- Tailor-made training for adaptation project formulation to access climate finance
- Matching process between scientific dataset and practical adaptation project demand
- Capacity building for management of climate-related risk information infrastructure
