

EDWARD ELGAR PUBLISHING

INTERLINKAGES BETWEEN THE SUSTAINABLE DEVELOPMENT GOALS

ABOUT THE BOOK

- The book provides an in-depth analysis of the interconnections between the economic, social, and environmental dimensions of sustainable development and the five pillars of the SDGs: peace, people, planet, prosperity, and partnerships.
- This book examines interlinkages at the thematic, regional, and country levels. Featuring case studies from across the globe, contributors explore the synergies and trade-offs among the SDGs using a variety of methodological approaches., also including examples of best practices and applications and demonstrating how interlinkages can be leveraged to achieve multiple SDGs simultaneously.
- **Contributors:** Experts from national statistical offices, regional and international agencies, research centers, and academia.
